# Investment Options to Keep You AND Your Pocketbook Happy

# Why should I invest in orthodontic treatment?

Spending time and money on orthodontic treatment is an investment in yourself or your child. While many people believe that orthodontic treatment only provides aesthetic benefits, the effects go far beyond only polishing up your appearance.

Proper orthodontic treatment brings out you or your child's naturally beautiful smile. Through straightening teeth and establishing proper alignment, you will receive a "good" bite that partners up appropriately with the opposite jaw. A good bite makes it easier to eat, chew and speak.

A straight, well-developed smile can build self-esteem and confidence. Instead of hiding your smile, you'll offer it happily. A great smile can help a lot when making first impressions, both socially and professionally.

The value of beautiful teeth is not just in appearances, though.

- **Reason One:** It's difficult to clean poorly aligned teeth. More plaque is apt to develop, which leads to increased cavities and other decay problems down the line.
- **Reason Two:** Gum disease occurs more frequently when you can't properly brush or floss your teeth. Gum disease presents a host of its own problems, but it is also linked to diabetes and heart disease.
- **Reason Three:** Misaligned teeth in children can lead to problems as adult teeth emerge, causing more crowding and space issues, requiring more invasive dental corrective procedures.

# What are my payment options?

Orthodontic treatment can seem expensive, especially depending on your individual needs and treatment plan. We are committed, with or without dental insurance, to helping you find an affordable method of paying for your or your child's dental care.

Our goal is to work with you to develop a payment plan that fits your budget and makes it easy for you to receive the best orthodontic care possible.

Our office accepts major credit cards and insurance plans. Additionally, we offer four other suggestions for financing options.

## **In-office, no-interest financing:**

With an easy down payment and scheduled automatic monthly deductions straight from your checking, credit card or savings account, we offer a convenient, no-interest loan to cover the cost of your orthodontic treatment plan. All financing decisions are made locally.

## **Local lending institutions:**

Contact your local bank for personal loans or lines of credit. Many financial institutions offer financing for healthcare solutions, including orthodontic treatment.

## **LendingClub:**

Low- and no-interest financing plans offer flexible terms, affordable payments to accommodate your budget needs and high approval rates. Apply online prior to your office visit.

## **CareCredit:**

With an instant online credit decision, you can access funds to pay for your entire treatment or just your deductible. CareCredit features low-interest options and easy monthly payment plans. Apply online prior to visiting our office.

# Questions?

We know that orthodontic treatment may seem confusing and complex. Our “Smile Out Loud” team will be glad to answer any questions you may have. We will provide all the information you need to determine what treatment is best for you or your child.
